RE: 2006 Cobalt LT Sedan
Vin. 1G1AL55F367780039

Dear Mark & Russ: Vice President +
President, GM
North America

Writing to get some relief as to the
defective vehicle manufactured by GM. This
above referenced ~~vehicle~~ ^{defective} caused a wreck on
Sept 24, 2009. My injuries were severe and
totaled the vehicle, approx 32,000 miles, at the time.
In March 2010, a recall on cobalts, my car was
one with a defective steering motor. Also,
the rear frontal impact should have deployed the
air bag. Did not. Air bag would have saved from injuries.
I would think GM would replace my
car with a new one; as their product is defective and also
help in assist with injuries, pain and suffering.
Please contact me as soon as possible

Thank you
Margaret A Creamer
